Think. Feel. Fish. 

“I’ve had a long standing relationship for Molix for many years. Molix provides me with the best and most cutting edge and unique bass fishing products in the world. The detail that goes into each Molix Bait helps me catch more fish! And Molix also shares my passion for fishing and growing the sport! And that’s SO IMPORTANT!”  
Mike Iaconelli

“I only align myself with company’s I truly believe in and the Molix brand is just that. They design unique baits. I’m also proud to see so many Bass being caught on my signature bait the Supernato Frog. To have my first Elite win on the GT Football jig made it so much more special to me.”  
Carl Jocumsen

## About us...

Molix is a dynamic brand from Italy and established itself worldwide with 100% Italian designed, innovative and originals fishing lures. Every single lure is manufactured following our high quality standards which easily rivals the toughest and finest world’s standards.

## Think. Feel. Fish...

This means respect for the anglers, for fishing and for the fish as well. We strongly believe that build a lure is making the anglers happy to enjoy the outdoors and share with them a common lifestyle. The Italian lifestyle! Every time we develop a new lure we always “think” about how it can improve our fishing skills, how the anglers “feel” going for it and what’s “fish” reaction to it. Enjoy Molix, enjoy your life and respect the environment around you.

## About our lures...

100% Italian design - in a country where living is style, attention to details and design.

High Quality Standards and innovation - Produced with high tech performance machinery, innovative materials and a strictly enforced quality control. Our lures feature a unique action as result of a combination of factors that make them noticeably different and innovative.

Attention to Details and Finishing - As Mike Iaconelli states about Molix wire baits: “really fine details, and when talking about details on a wire bait, I am not just talking about the lead head, but actual details on that head, a baitfish-looking head, with gills, with eyes, with color patterns”

Used successfully by Pros’ - Professional anglers all over the world think that Molix makes unbelievable 100% quality baits.

S E R I E S

“ I choose to use Molix products many years ago because of the level of quality, design, and uniqueness to the regular mass produced lures. The small subtle differences in each Molix Bait helps me get more bites and catch more fish! Molix also shares the same high level of passion for the sport of fishing! ”

**SPYBLADE**

**NEW Trago 65  
SPYBLADE**

REGISTERED DESIGN

WEIGHT  $\frac{1}{4}$  oz  
LENGTH 2.1/2 in

It was designed by the B.A.S.S. champion Mike Iaconelli. The Molix Trago 65 Spyblade was developed to be a unique and newly designed spybait, which differs from any others of its class for the hybrid body made of ABS and metal. This Metal Blade Body concept developed by Molix accentuates the transmission of the vibrations generated by the propellers to the whole structure and emits flashes during movement. The special custom-tailored stainless steel propellers allow the lure to jump into action as soon as it touches the water. The balance of the body enhances the shimmy action both in the fall and in the recovery, making it highly effective on suspended and suspicious fish. Equipped with chemically sharpened treble hooks for excellent hookset in all conditions.

# LOVER SHORT ARM SPINNERBAIT

REGISTERED DESIGN

The new Molix Short Arm spinnerbait is the real game changer. It's an "innovation machine" full of exclusive features starting from the original Molix custom design, lead free Zinc-Alloy head construction, 17/7 stainless steel wire which is more flexible than standard SS wires. This bait is completely hand tied made with fine cut silicon skirt and a custom double stripes built-in silicon trailer. It's equipped with a #4/0 OMTD hook and #4.5 or #5.5 single willow blade accordingly with the weight. The Short Arm is a Mike Iaconelli signature bait and it's offered in a complete "Mike's tournament tested" color selection.

# VENATOR BIG BLADE

DOUBLE WILLOW

REGISTERED DESIGN

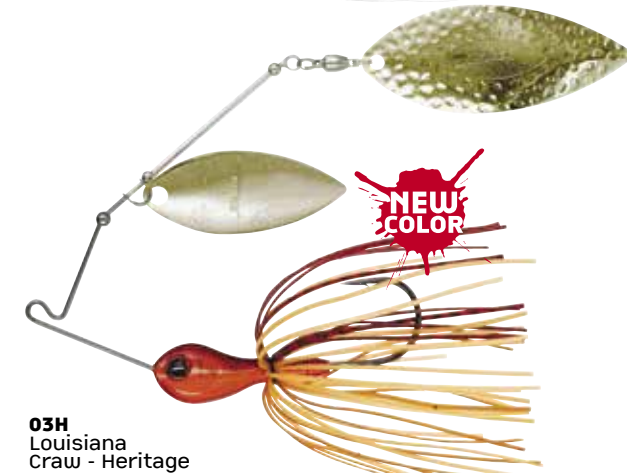

WEIGHT 1/2 oz

HERITAGE COLORS

The Venator is built with a "tapered" stainless steel wire. It's made with a thinner and flexible upper arm to trigger more vibrations right on the blades and a thicker lower arm to give more strength when you need to swing the fish right into the boat. The hook is made with a heavy wire and its very high quality compared with other spinnerbaits sold on the market. All those features make the new Venator one of the strongest and sought after lures ever build. Molix also paid serious attention to the head form. It is designed with a special "Flat Head" shape that gives the perfect balance during any retrieve to go with a super attractive side to side action. The oversized 3D eye is proven to attract the fish and give a natural appeal to this lure. The skirt is made with "fine cut" silicon and features a real life like action typical of schooling baitfish. The wide profile blade used on Venator helps to increase vibrations even during low speed and slow rolling retrieves. The oversize blade increases the vibrations and the flash lights by giving a massive presence to this spinnerbait.

# SPINNERBAITS

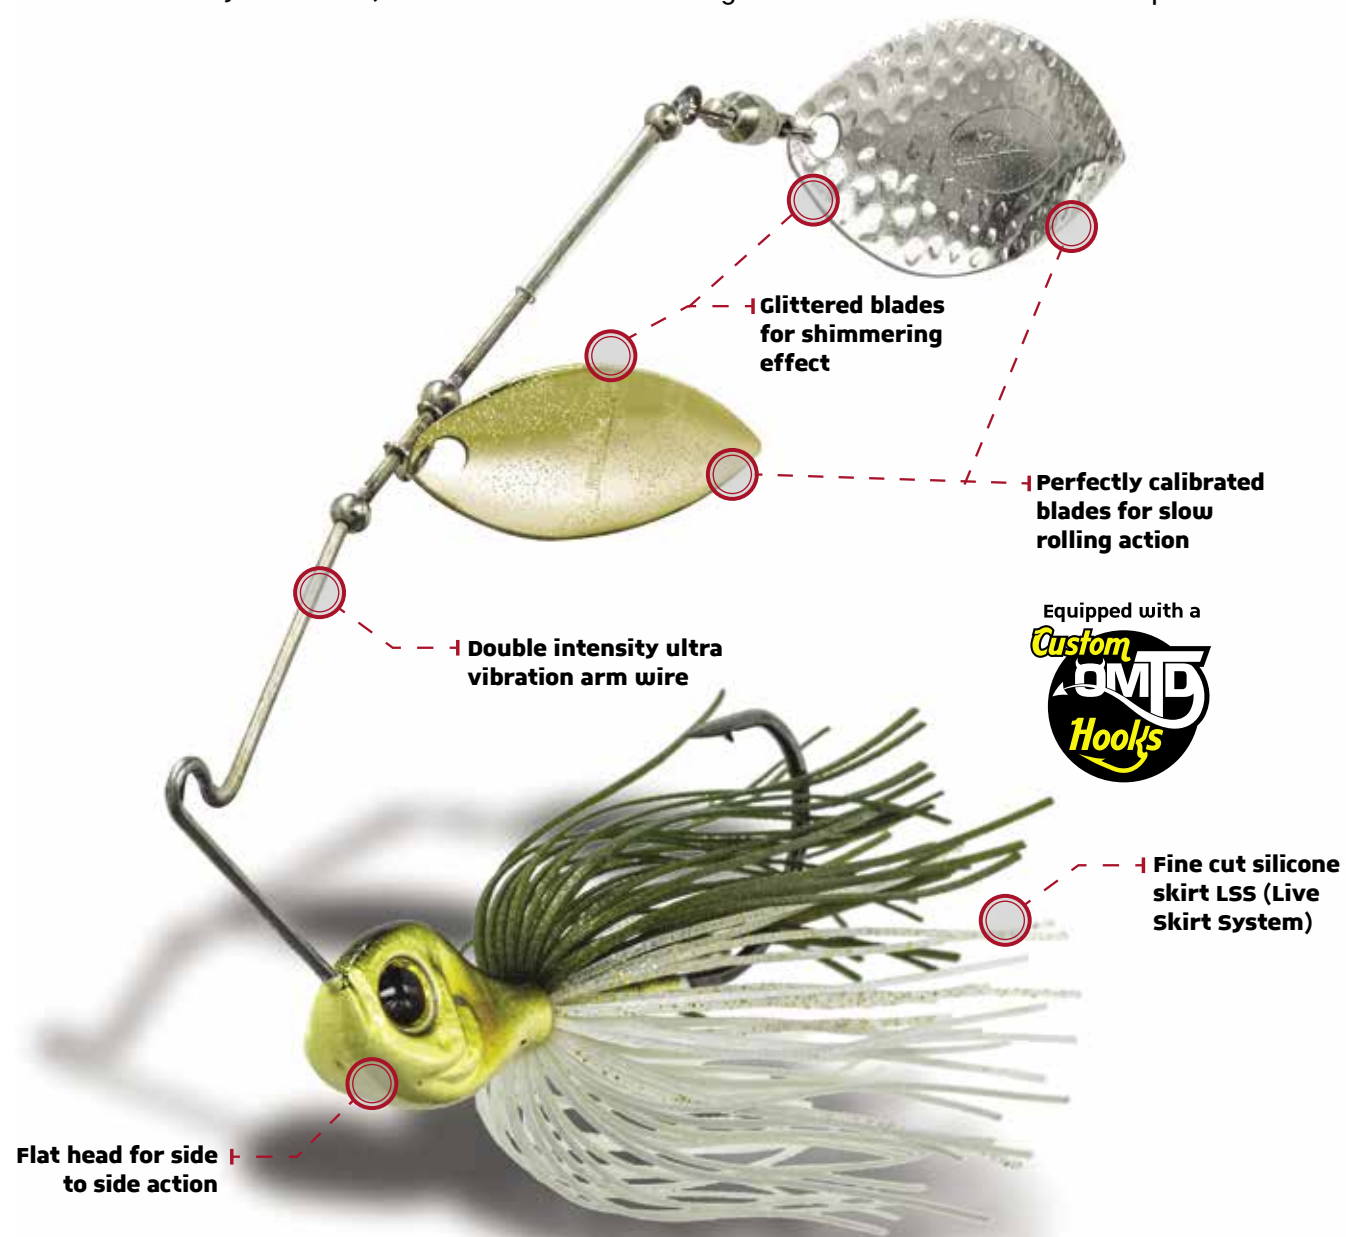

# VENATOR SR

DOUBLE WILLOW

## HERITAGE COLORS

REGISTERED DESIGN

The SR code for this version of the Venator means Slow Rolling and has been specifically designed for anglers looking for big predators that live in deep waters and hunt near the bottom. The Venator SR is obviously easy to fish slow rolling but also delivers a great performance for power fishing, when large baits are required. The blades are developed following an exclusive Molix design and perfectly calibrated to balance with the rest of the structure. The vibrations of the blades are amplified by the ultra flexible "double intensity" arm wire, which does not lose strength when stressed under severe pressure.

## MIKE'S TIPS

### 18 - Bogolu Dace

This color was modeled from the small minnow, chub, and dace forage species that bass love to eat! The skirt and head colors enhance the blade flash and vibration and cause the fish to react! This is a really versatile color that really shines in clearer water and stream and river situations!

### 19 - Pummel Fish

This was based off of the classic black and blue color that is so effective in other type of lures like jigs and vibration jigs. The toned down black blades make this one really special! It is perfect for low light conditions and for fishing at night! It's also a sleeper when fishing in extremely clear water!

### 20 - Purple Sinsay

This color was taken from the fact that most bait fish forage species have a white and purple sheen to their coloration. Shad, Alewife, Herring, White Perch, Crappie, White Bass and many other types of forage have these same color attributes. This color is also an amazing color in rivers and tidal water!

### 21 - Mud Vein

This is really cool color combination that is normally hard to find. It has several applications. First, for extremely muddy or stained water, the front orange blade and copper blade combination allows the bass to find it more easily. Also, it is a perfect match when fishing in tannic based water color where forage species like golden shiners and roach are present. The copper blade makes this one stand out!

### 22 - Neon Charmer

This loud color spinnerbaits has been one of my favorite colors for many years! It has several applications. First, for extremely aggressive fish and species like smallmouth or spotted bass, the bright chartreuse blades act as an aggravator and trigger an impulse strike; especially when retrieved very fast! The skirt color and flat mat finish head, make it a perfect match for many perch and panfish forage species that have a lot of chartreuse and pale orange coloration. Finally, like Mud Vein, it's also an amazing dirty water color and helps the bass track down the bait.

### 23 - Blue Gill

This color was created to match one of the most KEY forage species that bass eat: panfish, bluegill, sunfish, shell crackers and war mouths. The combination of blues, greens, and yellows in addition to the bar patterned head, make this a perfect match for all water conditions. This is a super versatile color that I love to fish any time I'm fishing around these panfish species!

## LOVER TITANIUM Spinnerbait PAT.P.

WEIGHT  $\frac{1}{2}$  oz  
HOOK SIZE 3/0

After over two years of studies and tests under any fishing condition, the Lover Titanium spinnerbait come true. Developed with a new assembling concept that use a special wire-head connection, this spinnerbait guarantee an high security level with enhanced capability power. The special Titanium-Nickel wire used to build it will amplify the vibrations emitted by the blades, this will make this spinnerbait particularly effective on finicky fish and in high pressured waters. The special colors for the USA market have been selected by U.S. pros like Mike Iaconelli. Available as DW (Double Willow).

## LOVER BUZZ SS SUPER SQUEAKY Junior

REGISTERED DESIGN

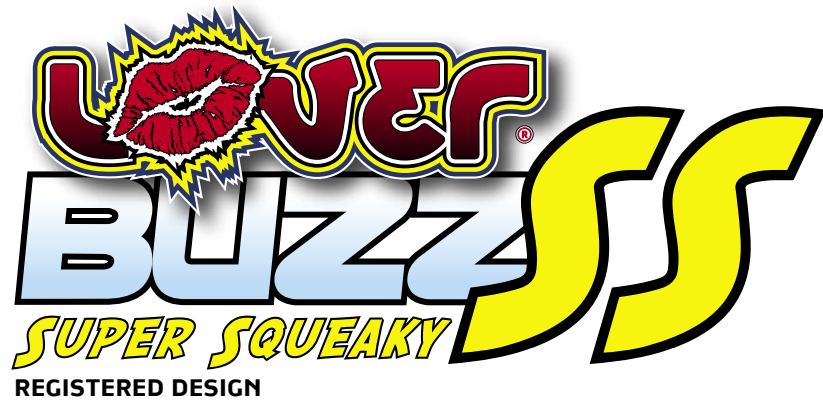

WEIGHT 1/4 oz  
HOOK SIZE 2/0

After the famous Lover Buzz SS, Molix realizes, in collaboration with Mike Iaconelli, the Lover Buzz SS Junior. Compared to the first, the body and the lip appear greatly reduced to obtain an inline buzz to be used with a light equipment, for an approach less invasive than a traditional buzz bait. Its vibrations on the surface, more discreet, the special "Squeaky" noise, and its compact size can stimulate the attack of apathetic and mistrustful fishes. It is effective in spots with high fishing pressure.

# [GT SWIM-JIG]

GOLDEN TEAM SERIES

The GT Swim-Jig was conceived to offer the maximum fishing performances in areas with obstacles such as submerged trees, docks or piers. Spots where you need to explore wider areas with the maximum effectiveness. The high anti-algae performance is guaranteed by the calibrated weed guard fibers based on the weight of the jig, which reduce the risk of stranding without compromising the effectiveness of the hook set. The worm keeper is made of resin to not unbalance the jig and ensures a perfect seal of the trailer. The skirt is made of silicone and gives a very realistic and natural movement in water.

SWIMMING & HEAVY COVER

WEIGHT 1/4 oz

WEIGHT 3/8 oz

WEIGHT 1/2 oz

The Molix Kento Jig is built with versatility in mind. Each jig head has been perfectly shaped and balanced for an easy penetration and perfect swimming. The number of fibers of the weedguard is based on the jig weight and combines a perfect weedless effect for solid hook sets. Offering a bait keeper, soft plastic trailers will be firmly held. The Kento Jig offers a very fine cut silicone skirt (Live Skirt System), providing natural movement and life like action.

## SKIRTED JIGS

# [TENAX-JIG]

FLIPPING & HEAVY COVER

*Wide Gap*

WEIGHT 3/8 oz

WEIGHT 1/2 oz

The Tenax is a jig designed to operate at its best in the densest vegetation and thickest cover. The head, an exclusive bullet-shaped design, facilitates a greater penetration even in the most intricate fishing conditions. The high efficiency of the weed guard is guaranteed by the fibers adjusted to the weight of the jig in order to reduce the risk of snagging. This U.S. Edition Tenax is built with the OMTD OH1900 hook featuring a wider gap which performs also with big trailers that give a visible stand up effect. The hook point design allows better hook up and reduces the lost of the fish during the fight and retrieve. The skirt is made with an innovative "fine cut" silicone, which provides it a very realistic and natural motion, called "LSS" (Live Skirt System).

## [NANO-JIG]

### FINESSE & STILL PRESENTATION

The Nano Jig is designed for finesse applications when a subtle and natural presentation is required. It is an evolution of the Racing Jig head with the addition of an ultra-fine silicone skirt and reinforced the weed guard. It's ideal for a perfect presentation inside thick covers or to let it slip between the surfacing structures. The versatility of its head allows the use of it in any environment. The Nano Jig is recommended when you need smaller and effective jigs, and a more "finesse" approach helps sorting out even the most difficult days.

## Pop Frog RATTLIN' REGISTERED DESIGN

Floating  
WEIGHT  $\frac{5}{8}$  oz  
LENGTH  $2\frac{1}{2}$  in  
DEEP RANGE Surface

The new "Rattlin" Pop Frog is an innovative hollowbody frog created in collaboration with USA Team Frog Eaters. This innovative Pop Frog stands out for its exclusive design and attention to detail that make it versatile and suitable for different styles of fishing and action.

Unique for the dual possibility of being used as a classic pop frog, creating a strong sound recall on the surface or as a WTD, obtaining a sinuous and enticing swimming.

It is equipped with a double stron OMTD Custom Hook, characterized by an additional eyelet that allows you to further customize the bait: with a blade to create additional vibrations and flashes of light, or with an additional anchor if you are fishing in waters free and unobstructed.

## Supernato Frog

PAT.P.

**CARL JOCUMSEN**  
signature baits

**TOTAL WEIGHT** 3/4 oz  
**TOTAL LENGTH** 4.1/2 in  
**BODY LENGTH** 2.1/2 in  
**TAIL LENGTH** 2 in

A new hybrid bait developed by Molix, with the contribution of Carl Jocumsen, Australian-USA Pro Angler, expert and talented frog angler. It was conceived by exploiting the hydrodynamics and the buoyancy of the realistic body of a classic frog bait. The double tail made of a high density mixture creates high frequency vibrations. The two parts of the bait are joined by a solid mechanism fixed in the back part of the body of the frog. The fastening system allows a quick and precise assembly and the possibility to use customized tails of any type and shape. The inward-facing appendages can move during the retrieval phases like a true propeller. It lends itself to slow and fast retrieval over the vegetation or also to powerful jerks-strokes. The Supernato Frog is armed with a double and strong OMTD Custom hook.

LENGTH  $2\frac{3}{4}$  in

**SUPERNATO BABY**

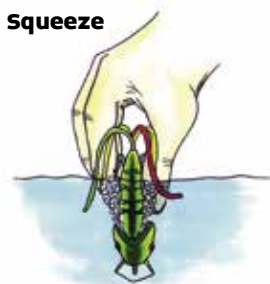

WEIGHT  $\frac{3}{8}$  oz  
LENGTH  $1\frac{3}{4}$  in

The Molix Supernato is a hybrid crankbait offering a whole new level of versatility. The idea was to have a crankbait that you can use inside heavy cover and thick vegetation as well as open water, and that also works at a variety of depths (depending on retrieve speed). Created with the best materials and assembled by hand, piece-by-piece by selected craftsmen, it is built with two different sections - one hard and one soft.

The Supernato is coated with a special film that provides the bait with a very realistic skin effect. It will be available in eight unbeatable color patterns.

# SWIMBAITS

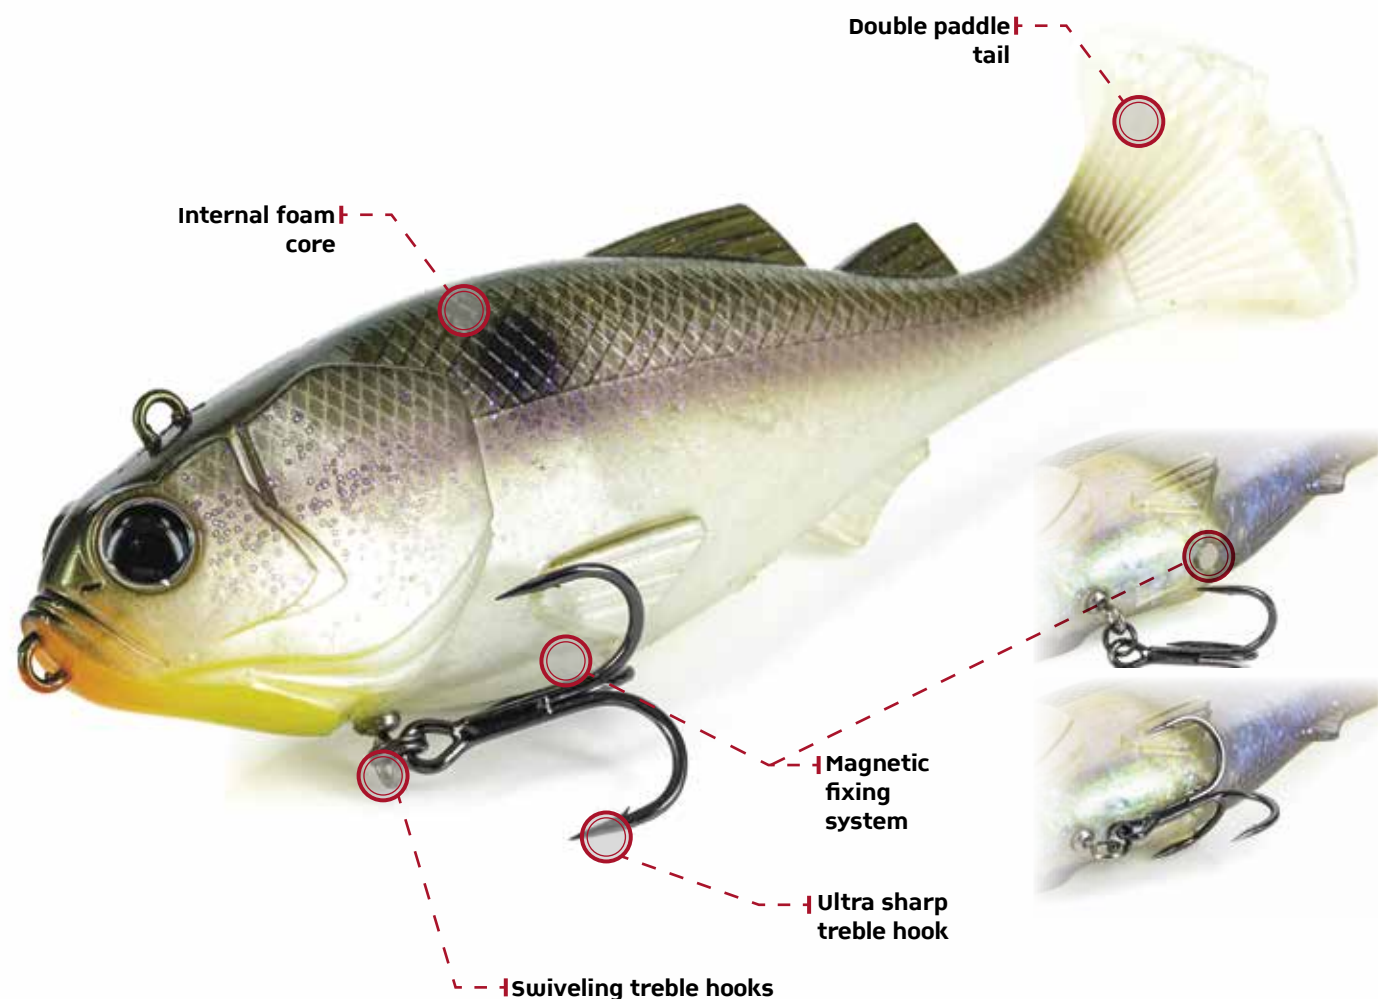

**NEW**

## Hybrid Swimmer 165

REGISTERED DESIGN

**WEIGHT** 2.1/2 oz  
**LENGTH** 6.1/2 in

The Hybrid Swimmer it's a soft plastic hybrid swimbait designed and developed to search for large predatory fish. It's easy to cast and helps to cover a lot of water. Through his particular shape of the tail, it generates a very attractive vibration, featuring a tight swimming action that stimulates the most suspicious predators who tend to follow the bait before attacking it. The Hybrid Swimmer is perfect for probing all water levels as it is made with an internal foam core that allows the bait to maintain the perfect balance even down deep where large fish often park. It is equipped with a quality treble hook chemically sharpened, which guarantees resistance to the most demanding fights. The hook is kept in position along the body by a magnet and makes easier to fight the fish thanks to a built in swivel.

# RT FLIP TAIL 3" WEEDLESS INVERTED PADDLE TAIL

Sinking  
WEIGHT  $\frac{3}{8}$  oz  
LENGTH 3 in

Sinking  
WEIGHT  $\frac{1}{2}$  oz  
LENGTH 3 in

The new Molix RT FLIP TAIL is extremely lifelike, the perfect lure to stimulate aggressive strikes from all kind of predator. It's made with "lead free" Zinc Alloy weight armed with a premium quality weedless hook. The wire weedguard allows this swimbait to walk easily on top of the weed pads and through heavy covers. The softness of the plastic body enhance the lifelike appeal of the baits and increase vibrations during any retrieval speed. The reverse position of the tail induces an original swimming action to this bait enticing tremendous reaction bites even from the most suspicious fish.

## SHAD 120 4.5/8" SWIMBAIT

Sinking  
WEIGHT 1.1/4 oz  
LENGTH 4.3/4 in  
DEEP RANGE 1.3 to 4 feet

It is a soft swimbait, for the great predators that live in deeper waters where jerkbaits and spinnerbaits don't arrive and where a traditional soft bait struggle to be attractive. The high frequency vibrations, produced by the blade inserted under the belly, recall even the fishes that swim far from this lure, even in murky waters. The position of the ring in the head allows it to be used effectively also vertically. It's made with a new blend that makes it resistent and durable.

## SS SHAD 4" SPECIAL SWIMMING SHAD

The SS Shad 4" means "Special Swimming Shad" because with this new soft swimbait we worked to provide you with a very special bait. It's made with a premium flavored plastic blend that gives the lure a natural action and increases its attractive power. The special flat shape comes from the study of hydrodynamic flows. It's made to enhance the movement and the narrow irregular oscillations of the lure. The main news lies in a system of interchangeable weights inside EWC (Easy Weights Change) Pat P. which allow you to easily change the weight inside the bait with a couple of simple operations. "A modern soft swimbait easy to use and effective with any size of Black Bass".

# FLEX SERIES

## RT FORK FLEX

REGISTERED DESIGN

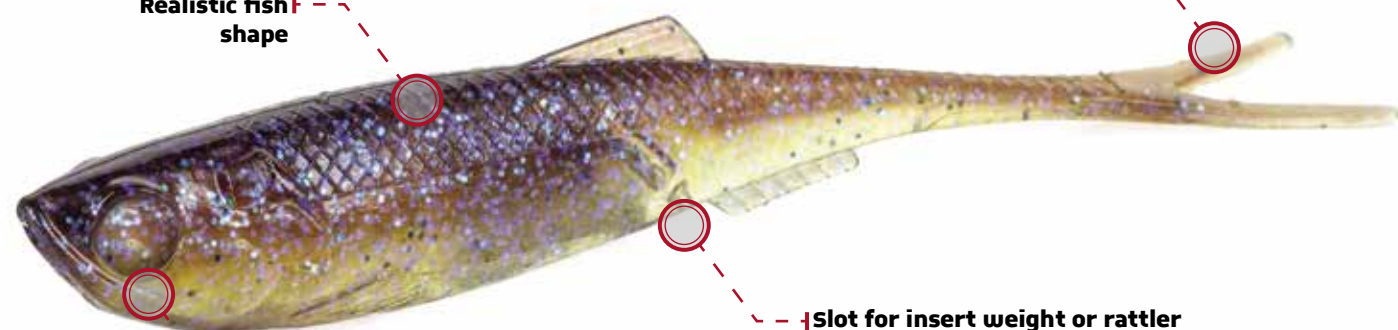

It is made using the exclusive MOLIX FORMULA; this formula is made of an extremely buoyant compound, soft and flexible. It is more resistant to cutting and it is enriched with salt and scent. It is a perfect lure for multiple types of rigs and for different predators both in fresh and saltwater. Its particular shape and the V-tail allows a sinuous and attractive movement, giving this lure various possibilities of use: drop shot presentations, armed with jig heads or with weedless hooks for fishing in areas full of obstacles, and for vertical presentations such as those required by the Pelagic technique. It is erratic if retrieved like a classic walking the dog bait or slow and sinuous while you are researching for the fish. The floating compound with which it is made makes it more visible in the stop phases on the bottom. The RT FORK is equipped with a small pocket where can be entered an insert weight or a rattler to increase its attractive power.

# CALEO CRAWBABY

LENGTH **3** in  
PACK **10** pcs

The Baby Caleo is the smaller version of the Caleo and imitates the crawfish found into most body of water. The Baby Caleo Craw body is realized with a “variable” plastic mix: high density in his body and low density in his clamps. This allow us to have a consistent and dense body, thick enough to penetrate inside the heavy cover, and a pair of natural attractive clamps with a stand-up effect typical of the crawfish in defensive position. Another important feature are the “flaps” located below the body. They produce strong vibrations that can be heard by the lateral line of the fish and catch the air during the cast to release it during the fishing action. The Baby Caleo is poured with micro salt crystals and enhanced with Bio-Amino Scent, an exclusive natural extracts base formula. The Baby Caleo Craw is the perfect lure for pitching and flipping. It can be rigged with jig head, Carolina style, as jig trailer or weightless for a natural falling action. Being smaller than the Caleo Craw is better suited for finesse presentations.

# SV CRAW

## 3.5" MAGNUM

### SUPER VIBRATION CRAW

LENGTH 3.1/2 in  
PACK 5 pcs

The SV Craw 3.5" is the "magnum" version of Molix's most popular SV Craw. The claws, which are the most functional and mobile part of this bait, have great amount of vibration during descent or retrieve. It's fat but compact body features a great penetration into the heaviest of cover. The SV Craw 3.5" can be easily rigged Texas, Neko, with a jig head or used like trailer on big jigs.

**molix**

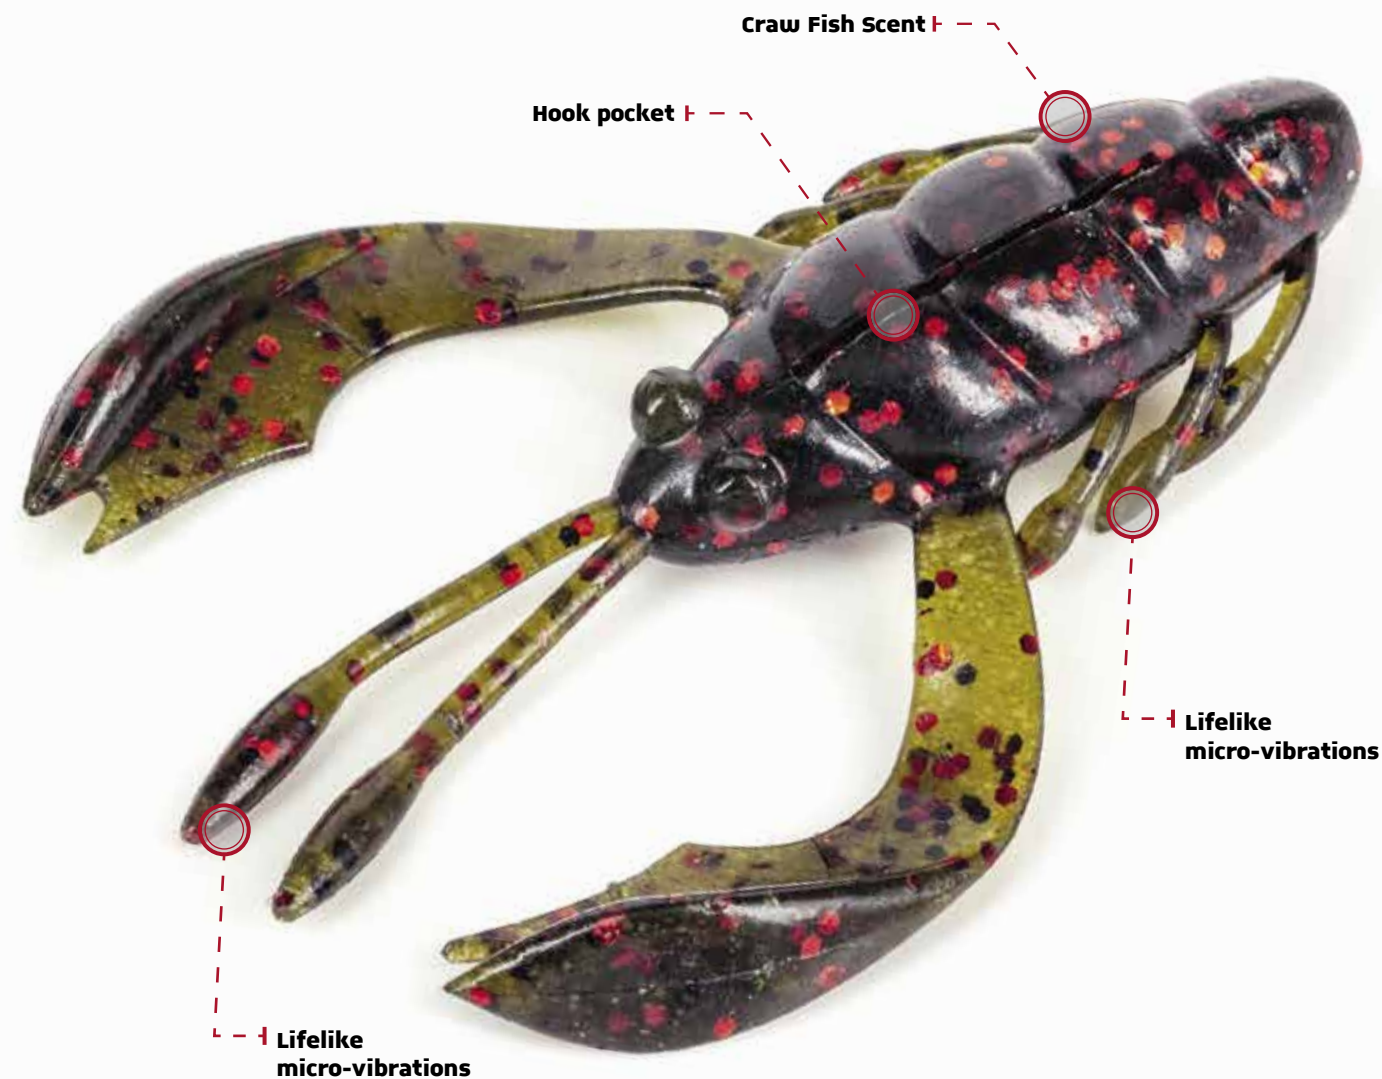

think.feel.fish.

# CRAWS

## SV CRAW SUPER VIBRATION CRAW

LENGTH 2.75 in  
PACK 6 pcs

If a crawfish imitation is what you're looking for - look no further. Designed by Italian lure company Molix, the SV Craw offers ingenuity and responsiveness you just can't find with standard baits. Featuring two realistic claw-like arms, the SV Craw is specifically engineered to catch water, resulting in extreme flapping action. A perfect trailer for the Molix Tenax and Kento Jigs, it's loaded with Molix's exclusive crawfish scent for added fish attraction. Molix also understands the importance of protecting your investment. That's why every bait is laid out and packaged in an individual clamshell pocket. Molix is a relative new comer to the United States, but their baits have already been used with great success by veteran Bassmaster Elite Series anglers.

# SIDUS 145

LENGTH **5.7** in  
PACK **10** pcs

The Sidus is poured with an exclusive mix of “variable density plastic” used for this bait and formulated to give this lure more consistency, longer castability and better penetration into the heavy cover. It’s also well balanced with a more natural movement underwater. The Sidus 145 is perfect for finesse presentation where the natural movement is a must and for pitching where a more compact head is important to penetrate the cover. The “flaps” along the body catch the air during the cast and release it in action to attract more fish. Also they give a life like action to the lure and create vibrations just like the real forage fish does. It’s poured with micro salt crystals and enhanced with Bio-Amino Scent, an exclusive natural extracts base formula.

## Trago **SPIN TAIL** **WILLOW**

Innovative lure with a compact profile and ultra-realistic shape and action. Custom 3D eyes, equipped with a high quality swivel to improve the rotation and vibrations emitted by the Willow blade placed in the tail. It is perfect for search fishing, casting long distances and vertical fishing. The Trago Spin Tail Willow is more suitable in clear waters and with suspicious fish. The Willow Blade generates low frequency vibrations and takes advantage of the strong visual appeal generated by the blade. It can be used successfully both in FW and SW and for different types of predators. It is made of zinc alloy with respect for nature and ecosystems.

- 3D eyes
- Innovative ZINC ALLOY body
- Ballbearing swivels with dynamic movement
- original willow blade for low frequency vibrations
- Super sharp treble hook

## Trago VIB

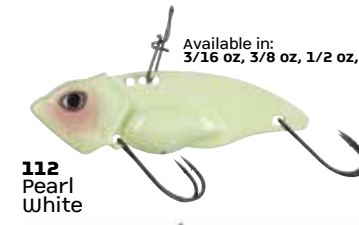

WEIGHT 3/16 oz

WEIGHT 3/8 oz

WEIGHT 1/2 oz

WEIGHT 3/4 oz

The Trago Vib is a “metal concept lure” excellent for vertical presentations or fast retrieves, made possible thanks to the excellent balance and irregular wobbling action during the fall. The special paint finished through the “electro-painting” process ensures maximum strength and durability even under extreme fishing use, both freshwater and saltwater, a territory yet to be explored for this category of baits. The double hooks offer a wider opening angle so as to allow ready and safe hook ups. During our tests the Trago Vib, during winter and autumn, was effective with slow vertical presentations while it is recommended a faster retrieve in the warmer months when predators are active.

think.feel.fish.

# GLIDEBAITS

## NEW Glide Bait 140 LIP FLOATING

Floating  
WEIGHT 2.1/16 oz  
LENGTH 5.1/2 in

The Glide Bait 140 Lip is an extremely functional swimbait with a nice design and realistic aesthetic details. It's an extremely technical bait, starting from the still position in the water. It performs better with strong wind or accentuated wave motion where it is essential to give the bait a more nervous and recognizable movement. Retrieve it slowly in calm water conditions to trigger unexpected attacks. The Molix Glide Bait is equipped with quality treble hooks mounted on swivels to withstand the toughest fights. 3D eyes and soft and realistic fins complete this lure dedicated to the search for large predators.

**molix**

# MINNOW

## **NEW** Rolling Minnow **85** REGISTERED DESIGN

**Fast Sinking**  
**WEIGHT** 1/2 oz  
**LENGTH** 3.3/8 in  
**DEEP RANGE** 4 to 5.9 feet

The Rolling Minnow features a tapered shape and a high weight in a compact body. This gives a great versatility, allowing it to reach excellent casting distances and perfect stability in waters with strong currents. The action is enhanced by a wide rolling even at high speeds, obtained through the distribution of the weights inside and a perfect balance. The Rolling Minnow is the extra weapon to search for predators who prefer fast retrieves in both fresh and salt water. It's built with full wire stainless steel armor for maximum strength.

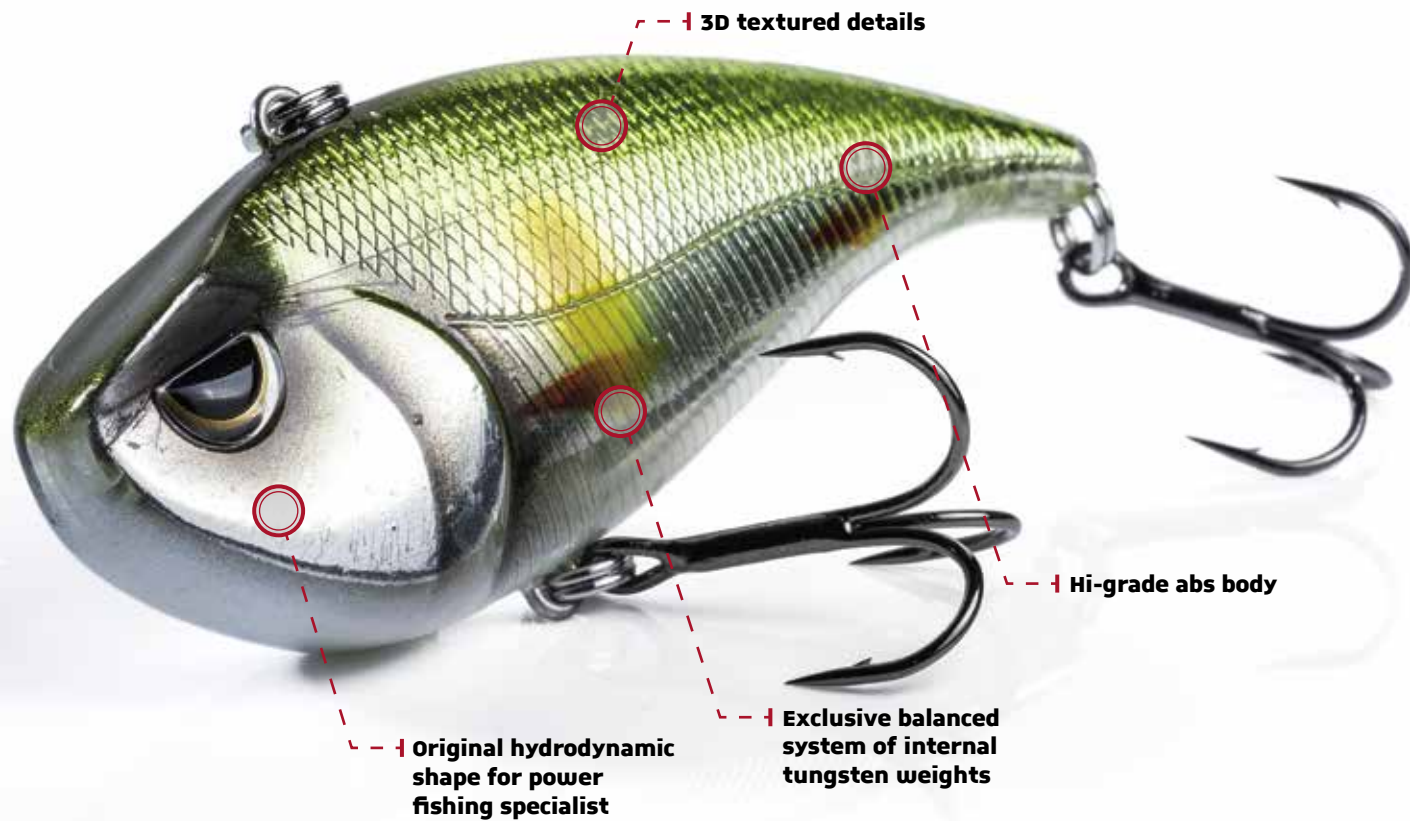

# Lipless **CRANK**

**LIPLESS CRANKBAIT**

Sinking  
WEIGHT  $\frac{3}{4}$  oz  
LENGTH  $2\frac{3}{4}$  in

"A modern lure with a unique and inimitable swimming action". The new balanced system of internal tungsten weights ( $\frac{3}{4}$ oz) and the original aerodynamic shape of the body make this bait easy to use. Cover a lot of water in a short time with excellent performance. The most important change is in the special high-frequency sound produced by tungsten balls that combined with the innovative ABS Special Grade body gives this lure an excellent attractive power.

Designed and developed to face the wind and strong currents. But excel especially with large freshwater predators such as black bass and big trout. Use it with confidence when predators are stationed in areas rich of obstacles and its effectiveness will surprise you.

# Piper

**Sinking**  
**WEIGHT** 5/16 oz  
**LENGTH** 2.1/2 in  
**DEEP RANGE** 1.6 to 5 feet

The Piper is a small and amazing bait that comes with a sleek and compact design in order to achieve the greatest possible distances regardless of the circumstances. The study of the internal weights distribution returned into an original wobbling movement during the fall, which makes it "active" in every circumstance. During the retrieve you can build different actions, slow, fast or short jerks. In line with Molix' philosophy, the use of high quality parts and realistic painting completes the technical and aesthetic result. With the "Piper" you can target both freshwater and salt water predators, in fact, it is at sea that has lately obtained surprising results.

## FC 45

**FINESSE CRANK 45**  
REGISTERED DESIGN

The FC45 is a small compact bait made it for finesse cranking and sneaky presentations. With the proper sized fishing line it can dive until 2 meters and works right there where most of predators live. It has a tight wobbling action perfect for those situations where you need to imitate the right forage fish.

## SB CRANK SQUARE BILL **RATTLIN'**

**Floating**  
**WEIGHT** 3/8 oz  
**LENGTH** 2.1/4 in  
**DEEP RANGE** 0 to 3 feet

The SB Crank 55 is a square bill for power fishing cranking, in spots with tangled covers. It moves easily through the obstacles, without losing the wobbling movement. This action, during slow retrievals, characterizes the originality of this lure compared to other crankbaits. The compact body support the casting and makes the bait effective as soon as you touch the reel. Also try making it wag on water or pushing it firmly into deep areas.

**molix**

think.feel.fish.

**NEW**

# PENCIL POPPER 200T

REGISTERED DESIGN

Floating  
WEIGHT 1.1/2 oz  
LENGTH 8 in  
Surface  
DEEP RANGE

It's the new born of the "Tarpon" topwater series and satisfies the need for a lure of above average length and a thin profile. Thanks to the particular shape of the mouth, it produces turbulence that attract the predators. It has all the benefits of a reinforced ABS construction, 1.5mm stainless steel through armor and high quality extra strong SW treble hooks. It is effective both shore and boat fishing and its action is customizable through long bubble tunnels or short "pop and stop" which produce a distinctive attractive sound. Despite being a pencil-popper, it also lends itself to being used with the classic WTD retrieval. Carved and developed in the Jack Fin workshop with artisan techniques, it has all the features and details of a collector's bait. Developed for Mediterranean predators such as Bluefishes, Barracudas and Leerfishes, it is also able to withstand the strong stresses of medium / heavy fishing in tropical waters.

Reinforced ABS construction

Wire through Concept

Lifelike embossed scales

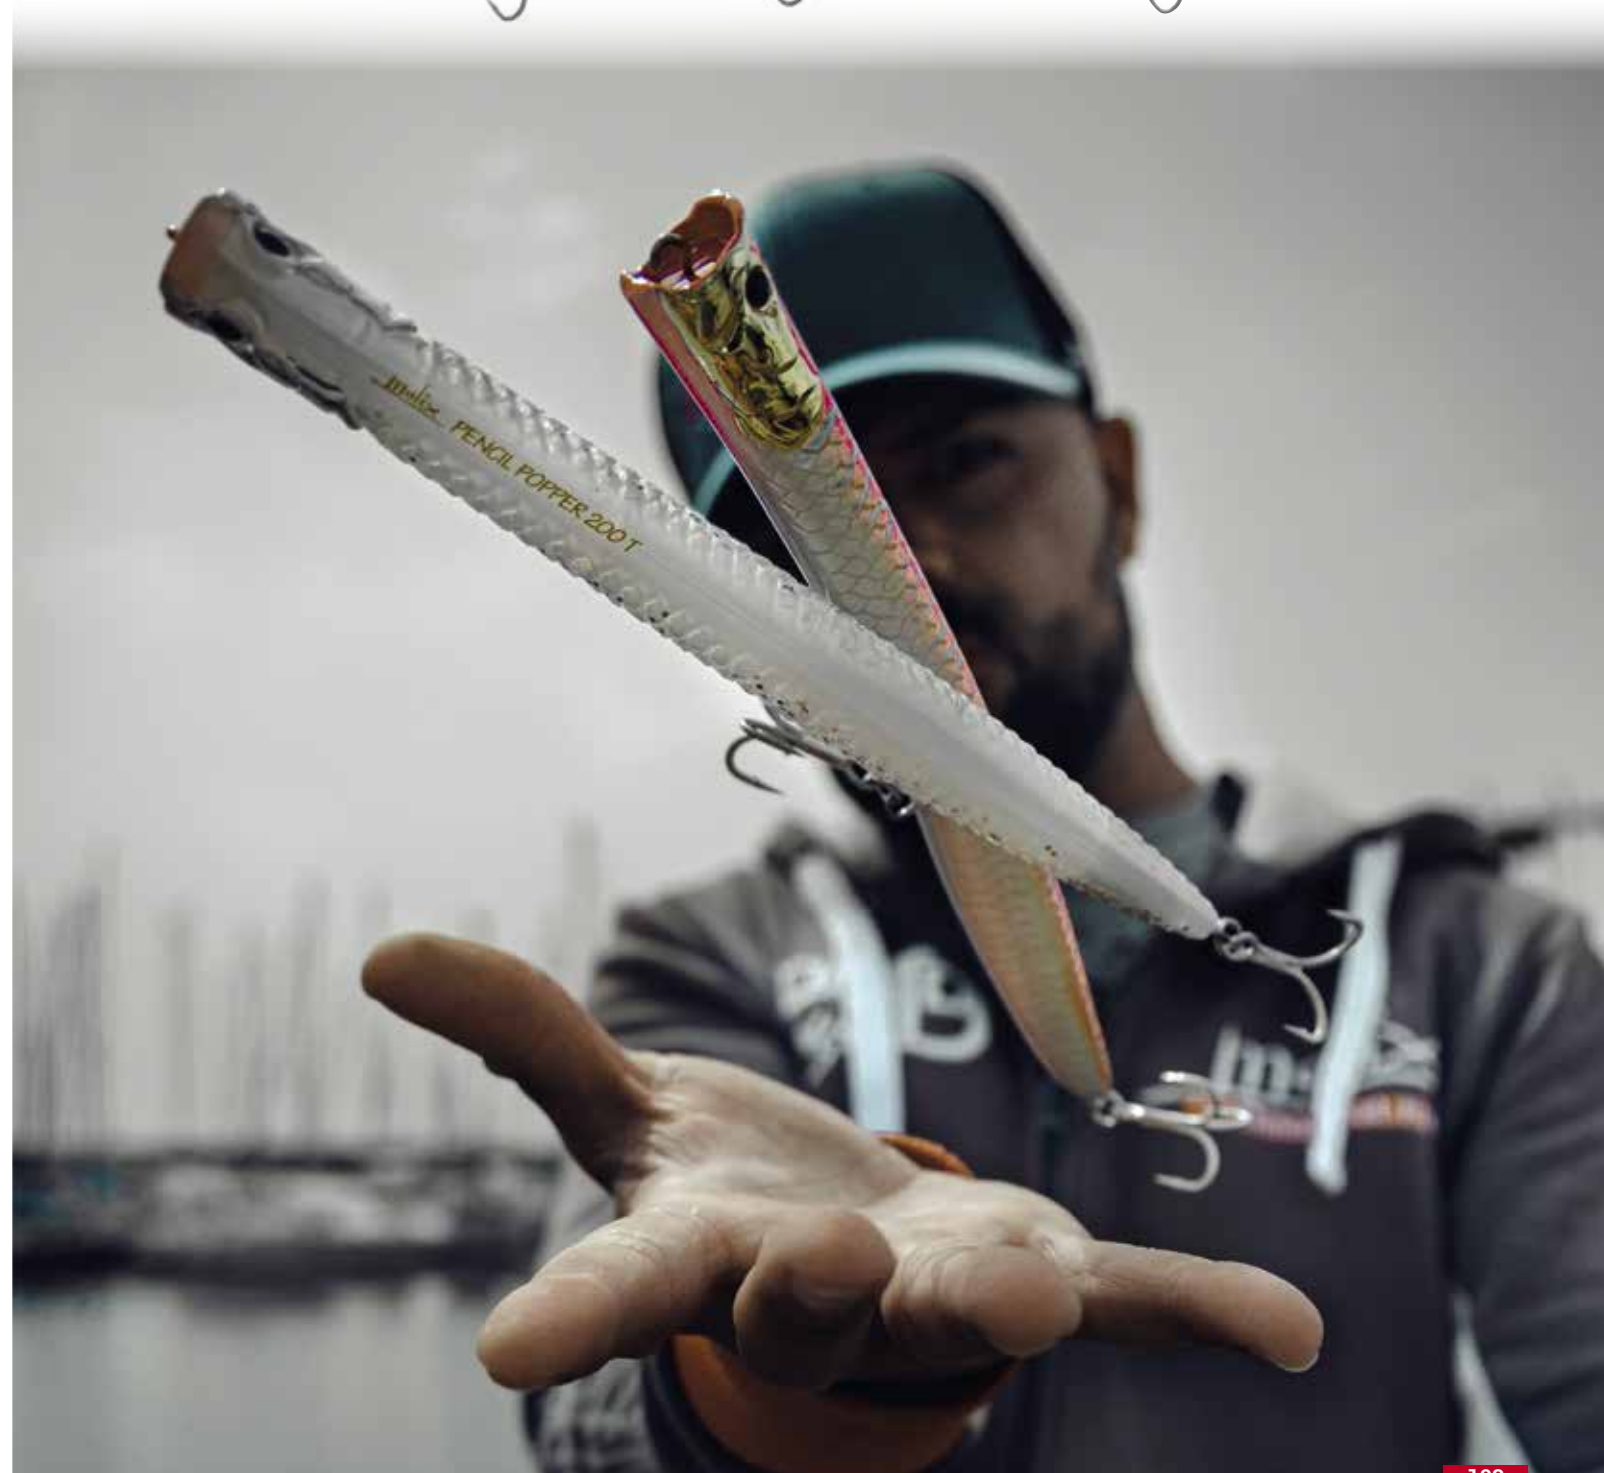

High quality treble hooks

Mouth design for a innovative swimming action, bubble trail action, single "splash"

**HANDCRAFTED DEVELOPED BY JACK FIN  
FOR NEW MOLIX 3D TECHNOLOGY**

## TOP WATER

## POPPER 130T

POPPER TARPON  
REGISTERED DESIGN

Floating  
WEIGHT 1.3/8 oz  
LENGTH 5 in  
DEEP RANGE Surface

The popper 130T is versatile and retrieving it in different ways can fit many situations. When you are searching for predators: decided jerks create powerful "pops" on the surface; with softer and linear jerks, it produces tunnels of bubbles, that attract predators from long distance. The main feature that sets it apart is the sound it emits during the 'popping' action, obtained thanks to the innovative design of the mouth and to the tapered shape of the body. The armor is made of stainless steel, the body is made of ABS, and the coating and extra durable paints with high quality treble hooks allow the fisherman to use the POPPER 130T even with large predators.

HANDCRAFTED DEVELOPED BY JACK FIN  
FOR NEW MOLIX 3D TECHNOLOGY

# Shaman Popper

**Floating**  
**WEIGHT** 7/16 oz  
**LENGTH** 3.1/4 in  
**DEEP RANGE** Surface

Are all poppers the same? Only apparently! Just think about so many high quality poppers, all of them are top water baits right? Right! All of them are excellently finished with super treble hooks right? Right! So all these lures are the same right? Wrong! Because only Molix is designed and developed totally in Italy sharing experiences and ideas with several professional anglers that made their hobby a real lifestyle. The Shaman is an innovative high performances lure, original, easy to cast and created by anglers for anglers. What else?

**CATALOG**

Thank you for deciding to view our catalogue and again you are welcome to the world of OMTD hooks and jigheads.

OMTD is an Italian brand, its design was inspired by the increasing evolution of the fishing lures

A completely Italian idea for hooks and Jigheads with peculiar features, created for fishermen demanding and attentive to the ongoing development of the fishing techniques.

The design, the performances and the technology are three fundamental elements of OMTD. The company has made sustained efforts in the research and in the innovation with the aim of offering fishermen hooks and jigheads, for professional or for free time fishing, of great functionality and design.

An Italian design that interprets the design culture of the project to develop solutions and new materials and that often works closely with fishermen to bring ideas, insights and experiences from many parts of the world.

OMTD Pierce Point has been designed for a positive and effective hookset in different positions and angles that can be created between rod and hook.

The forged and reinforced steel, in the most stressed parts, ensures safety and resistance during the various stages of the fight.

Special Micro-Barb for excellent hookset.

Hi-Grade stainless steel hook for the large predators fishing.

The composite of tungsten is much harder and resistant than traditional lead, permitting a very natural action of the bait.

Finished with a Nickel Tin dip, for a long lasting rust proof life.

Lure Keeper eyelet with the quick release system. This solution allows to fix the bait on the hook in a stable manner without damaging it.

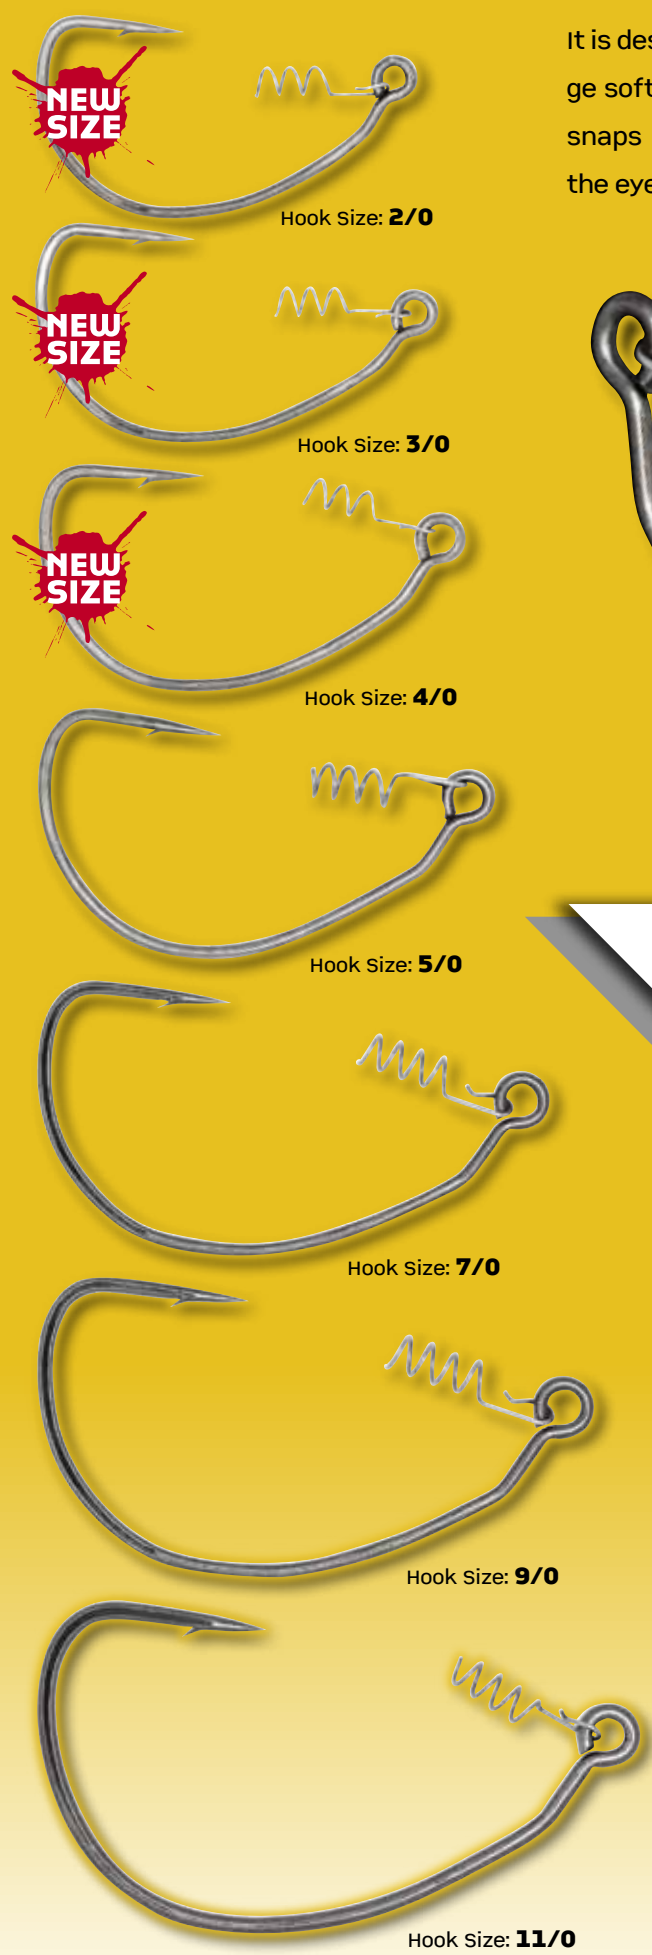

Good for weedless rigging application on swim-baits, shads and big soft baits. It's equipped with an high visible and attractive blade that enhance vibrations. The blade is rigged on a swivel and positioned on the weight at a proper distance from the hook. The weight shape increases the attractive movement of the bait which is solidly attached through a spring keeper.
